

Take CHARGE of your Health.

Do you have a "to do" list of lab orders from the doctor & want to save money? **Healthchek does not require an order for testing, and we enjoy saving you money!**

Don't have a doctor? Haven't seen one? **Profile 1 is a general health status, the tests many doctors want annually.**

On medication? Do you need bloodwork before your next doctor visit? **Healthchek will fax results to the doctor before you run out of medication.**
(Please time your visit with us accordingly)

How long until I get my results? **Most test results are back within 24 to 48 hours, some tests may take longer.**
Please allow enough time between blood test and your doctor appointment. Results are mailed, or emailed encrypted, and faxed.

Our friendly technicians are highly skilled and offer a pain-free encounter.

Family owned and operated since 1985.
We are dedicated to providing affordable, beneficial, and convenient, low-cost medical testing.

- ♥ You may have an illness slowly developing, if caught early it may be curable or manageable.
- ♥ Prolong your life, avoid premature death, and disability through early detection and prevention of disease.
- ♥ Keep medical documentation for all of your Healthchek screenings and share them with your doctor.
- ♥ Know your family medical history and early warning signs of disease you're at risk for.

A1C \$30 This test gives the average blood sugar for the past 90 days, used to detect and manage diabetes.

Arthritis Profile \$80 ANA, ASO, Rheumatoid Factor, ESR (Sedimentation Rate).

Blood Group/Rh Type \$25 ABO blood group (A, B, AB, O) and type (+ positive or - negative).

Cardio CRP (High Sensitivity) \$50 Helps determine relative *risk* of cardiovascular disease.

CK Total (Creatine Kinase) \$20 Monitors the affects of certain medications, such as statin drugs. Increased levels may indicate myocardial infarction (heart attack).

Cortisol Total \$85 The cortisol level may show problems with the adrenal glands or pituitary gland. Cortisol is made by the adrenal glands.

Ferritin \$40 Lower than normal levels may help determine iron deficiency and anemia. Higher than normal levels could indicate liver disease, Rheumatoid Arthritis, and hyperthyroidism.

Folic Acid (Folate) \$50 Low folic acid levels may be the result of a primary vitamin B 12 Deficiency that decreases the ability of cells to take up folic acid.

FSH (Follicle Stimulating Hormone) \$30 Helps manage the menstrual cycle, used to diagnose menopause, ovarian cysts, abnormal bleeding.

Homocysteine \$45 High levels are linked to early development of heart disease. In fact, **high** levels of Homocysteine are a risk factor for heart disease and is associated with **low** levels of Vitamin B12 and Folate.

Homocysteine, Vitamin B 12 & Folate Panel \$85

Iron/TIBC \$20 Useful in confirming the diagnosis of iron-deficiency anemia or hemochromatosis (too much iron in the body).

Lipid Panel (Coronary Risk) \$25 Cholesterol Total, HDL, LDL, Triglycerides, Cholesterol/HDL Ratio.

Liver Function Test (Hepatic) \$30 Total Protein, Albumin, Globulin (calculated), Albumin/Globulin Ratio (calculated), ALT, AST, Total Bilirubin, Direct Bilirubin, Indirect Bilirubin (calculated), Alkaline Phosphatase (GGT not in this panel).

Obstetric Panel (Prenatal) \$85 Includes Hepatitis B Surf. Antibody, Antibody Screen, Rubella Titer, Blood Group/Type, CBC, RPR/Syphilis

PSA (Prostate Specific Antigen) \$35 Early detection of prostate cancer; recommended annually for men 30 yrs & over.

Thyroid Panel \$90 TPO Thyroid Peroxidase Antibody, TSH, Free T 3, Free T 4

TSH (Thyroid Stimulating Hormone) \$35 Useful in screening for hyperthyroidism and to evaluate thyroid function, mainly to see if it is underworking or overworking.

T4 Total (Thyroxine) \$20 Measures the total amount of circulating thyroxine in your blood. Used to diagnose hypothyroidism and hyperthyroidism.

T3 Total (Triiodothyronine) \$50 Measurement used to diagnose and monitor treatment of hyperthyroidism.

T3 Free \$50 Used to diagnose hyperthyroidism and to clarify thyroid status in the presence of a possible protein binding abnormality.

T4 Free \$25 For diagnosis of hypothyroidism and hyperthyroidism. How well your thyroid gland is working.

Testosterone Total \$70 (preferred draw time 8-10am)

Refrain from taking Biotin supplement 8 hrs prior to draw.

(Suggested baseline age 18 males)

Detects testosterone levels in both men and women. Helps in diagnosing the following: Males: infertility, erectile dysfunction. Females: polycystic ovary syndrome (PCOS)

Vitamin B 12 & Vitamin D Panel \$70

Vitamin B12 \$50 Monitors an important vitamin for maintaining healthy nerve cells. B12 helps with cognitive deficits and emotional stability, promotes overall energy, and contributes to weight loss/control. Deficiency can lead to memory loss and other mental conditions.

Vitamin D (25-Hydroxy) \$60 Numerous studies have shown that many Americans have low vitamin D levels. Vitamin D has been shown to boost bone health and it may play a role in preventing diabetes, cancer, cardiovascular disease and other illnesses.
